

Cogeneration Power Plant

Capacity

1232 MW (4 x 308 MW)

Operation Hours

Gas turbines total
118,000 – 133,000 hours

Gas turbines from last overhaul
800 – 15,500 hours

Steam turbines total
124,000 – 133,000 hours

Steam turbines from last overhaul
75 – 11,700 hours

BRIEF DESCRIPTION

This power plant includes 8 gas turbines and 4 steam turbines to form 4 sets of power generation systems. Each one has 308 MW output. The last overhaul was done in 2012. All the equipment is in excellent condition and the plant is still in operation.
