Malic Acid Plant Equipment – 12000 TPY

Capacity: 12,000 TPY

Process Information: The equipment items are designed for reaction, crystallization and drying sections of a malic acid plant of 12,000 TPY capacity

Major Equipment

- Maleic Acid/Fumaric Acid Reactors
- Maleic Acid Finishing Reactor
- Fumaric Acid Reactors
- Raw Fumaric Acid Crystallizers
- Condensate Accumulators
- Raw Maleic Acid Crystallizer Evaporator
- Raw Maleic Acid Crystallizer
- Maleic Acid Solution Centrifuge
- Pure Maleic Acid Crystallizer Evaporator
- Pure Maleic Acid Crystallizer
- Maleic Acid Air Filter
- Maleic Acid Drying Unit Cyclone
- Maleic Acid Dryer Air Dehumidifier

Brief Plant Description

New, never-installed malic acid production equipment for sale immediately. The equipment items are designed for reaction, crystallization and drying sections of a malic acid plant of 12,000 TPY capacity. After the equipment was manufactured, the plant construction project was cancelled. Now all the available equipment is stored in warehouse. The technical documents associated with the equipment are available.
